

**Asthma letter (under 12)**

Dear Parents/Guardian

Our records show that your child has asthma and we would like to review this condition annually.

It is important that we keep an eye on this condition so that your child can be as healthy as possible into the future. Experience shows that, even if you think that the situation is under control, it is sometimes possible to feel a lot better with just some small changes to their treatment.

Can you please contact reception to make an appointment with the Practice Nurse for a review.

**Please bring to the appointment any inhalers you have.**
