

CKD Letter

Our records indicate that you have a medical condition that necessitates a regular blood pressure and urine check together with a blood test to check your renal function.

You will also need a regular cholesterol check if you have a history of coronary heart disease, stroke or narrowing of the arteries in your heart or legs.

To ensure that this is checked regularly, we are inviting you annually.

Can you please make an appointment with the Healthcare Assistant for a blood pressure check and blood test.

CAN YOU ALSO PLEASE PROVIDE US WITH AN EARLY MORNING MID-STREAM URINE SAMPLE. WHITE TOPPED STERILE POTS ARE AVAILABLE FROM THE SURGERY.

PLEASE TELL RECEPTIONIST THE REASON FOR THE SAMPLE SO IT CAN BE FORWARDED TO THE PATHOLOGY DEPARTMENT.
