

Hypothyroid letter

In order that we may monitor your underactive thyroid and ensure that your medication is effective, it is important that you have a regular blood test.

Please make an appointment with our phlebotomist for a blood test.

WHEN BOOKING PLEASE INFORM RECEPTION THAT THE APPOINTMENT IS FOR A HYPOTHYROID BLOOD TEST.

You may, as a result of your medical condition, be housebound and unable to get to the surgery. If so, the next time you are due to be visited at home by a doctor or nurse, please advise that you are due for this test.
